

Bruno Cazabat

SOFTWARE DEVELOPER

I am an enthusiastic, responsible and hardworking junior software developer with an experience of three years in Web and Mobile Development. Currently, I am pursuing a Master of Science in Software Technology. Being part of different projects helped me adapt to change quickly and made me a mature team worker. Furthermore, I learned how to deal with strict deadlines and work well under pressure. Given my strong technical background, I intend to engage in cutting-edge technology experiences that require innovation.

Improvement of existing methods in both data acquisition, processing and restitution.

Creation of solutions related to the processing of data flows in multi-technical systems.

PORTFOLIO "CURIOSITY FUELS INNOVATION"

My constant search for perfection, is constantly pushing me out of my comfort zone. When a product is considered done, we, nowadays, often overlook the User Experience in the favor of having a maximum number of features stacked into a single Interface. I exposed some of the projects that I previously worked on my [GitHub Account](#). Being a passionate of photography, I also have a [Portefolio](#).

EXPERIENCE

EXXETA - Software developer - May 2022 to December 2022

Stuttgart - Germany

Assisting in the Development of the EXXFER tool: ([company website here](#))

- Creation of new Interfaces on the platform with various Graphs to allow the final user a clearer "Overview Visualisation of the complexity of its own code".
- Deployment of CICD Modules in the Build Process to allow all developers to access a SonarQube Code Analyzer, using PMD, SpotBugs and other dependencies.
- Assisting in the creation of future Mockups, team-brainstorming for determining better objectives and clearer User Interfaces goals.
- Assisting on the organisation of Daily meetings, Sprint Plannings and other "team-related" events happening with a standard Agile Project Protocol.

Knowledge used: Java, SonarQube, Agile, Docker, GIT, AWS solutions, etc. 

MEDICFOLLOW - Co-Founder - April 2019, Ongoing
